

FOOD PACKAGING SOLUTIONS LTD.
9470 – 195 STREET
SURREY, BC
V4N4G2

As a convertor of packaging materials, JVR's objective is to create value for wholesalers, retailers, in-store bakeries, and food processors that need varying types and quantities of quality food / bakery boards and related products by providing them with customized goods, flexible order sizes, and timely service.

JVR products are used by retailers, bakeries, wholesalers, and processors throughout

Western Canada and the US and are available mainly through distributors. Our line of specialty products includes bake-able trays which are made from a moisture/grease resistant board. Our gold/silver boards are superior as they are oil resistant and do not delaminate, making them ideal for the meat and smoked fish industries. In addition, we offer customer specific corrugated shipping boxes/mailers, trays, liners, and dividers.
